Subject: FW: FOIA request

Mr Pyeron-

I sent the message prematurely. Sorry about that.

We will not be witholding any records from you, you will receive the
complete ZIP+4 recordset with the TIGER data appended to records for
which TIGER data exists. That is not a problem or issue for us.

One anomaly that you should probably be aware of is the fact that some
ZIP Codes have no records in the ZIP+4 file. These are unique ZIP Codes,
which are assigned to a specific firm at a specific address, and in some
cases we do not have any addresses coded for the ZIP Code. All we need
to get the mail to them is the 5-digit ZIP. The number of these cases is
small, a couple hundred, and from a GIS standpoint the territory should
be covered under other delivery area ZIP Codes.

Regarding your request for a fee waiver, please provide us with an
explanation of how your request is "in the public interest because it is
likely to contribute significantly to public understanding of the
operations or activities of the government and is not primarily in the
commercial interest of the requester. "

Also regarding fees for this request, you can find the USPS standard
processing fees at the following URL, near the bottom of the page:

http://www.usps.com/foia/annualreports/39cfr265.htm

We have currently expended 56 hours of programmer labor and 83 hours of
computer processing time on this project. However, pending the outcome
of our discussion of your fee waiver request, I'm prepared to discount
the fee heavily because it has taken us longer than expected to produce
the data.

Thank you.
